>> Statement of Commitment to Localization

PetroAlliance (PA) hereby declares its commitment to ensuring that localization of employment and services is promoted and protected. We will ensure that locals from the proximity of any of our operations sites across the Kurdistan Region, are given priority for employment and services where possible.

We confirm that all on-site positions will be advertised locally and all locals from the proximity of the proposed site will be given priority during the application stages. We are further committed to developing local trainees should certain positions not be found locally. It is our goal to make our team fully local as early as possible.

Priority will also be given to locals within the proximity of the operations site for services, such as provision of fuel, water and the collection of waste.

We at PA believe that the only sustainable way to work, is in harmony with the locals.

Yours sincerely,

Sevar Dleir
General Manager
P.A Consulting LLC
